WE NO LONGER ACCEPT FLASH/SWF CREATIVE

HTML5

The preferred method of receiving HTML5 creative is through 3rd party ad tags. Newsquest accept most code from 3rd party vendors. Here is a link to a complete list:

https://support.google.com/dfp_premium/answer/177366

If you wish to supply HTML5 files with Java/images (not through a vendor), please supply your creative early so we can test it.

Overview

HTML5 ads are expected to be larger than their Flash predecessors as Flash allows for better compressed and optimised single file delivery. However, owing to the nature of JavaScript, performance should remain a priority area for focus.

The initial file load size should not exceed 200KB. This is the size of the index.html file that is initially fetched from the ad server. It should contain the required code for the ad and manage asset loading. You should measure the ad file size after compressing it to a zip file. The archive must include all the assets and libraries used by the creative. If the ad contains multimedia formats (e.g. video/audio) the overall size should not exceed 10MB. This restriction is changed to 1.5MB if the multimedia assets are loaded from YouTube or any other optimised video delivery platform.

Optimisation

Ensuring proper optimisation is critical to providing high-performing creative. High latency ads will show poorer performance as the user may have scrolled it out of view before it is loaded. You may wish to consider multiple network speeds and reliability when developing an HTML5 creative.

Ad server features

Newsquest Specialist Media uses Google Double Click for Publisher (DFP) to serve all ads. This allows us to provide targeted delivery and a powerful reporting platform.

DFP is set up to use asynchronous rendering across our portfolio ensuring that ad latency does not impact on the overall user experience. But, in that respect, it is crucial that you optimise your ad code so it does not rely on page elements (e.g. jQuery) as they may not be available at the time your creative is rendered. Additionally, the creative will be served in a friendly iFrame. While this set-up allows for content script to access the host page, it should be avoided and measures should be taken to avoid ID collision as the same tag could be used multiple times on the same page.

IMAGE FILES

We can accept animated/static GIFs, JPEGs and PNGs
Maximum file sizes are according to ad dimensions
RGB only 72dpi.

SUPPLYING FILES

Files should be sent by email to
